Narayan Shrestha

Backend Developer · Laravel · APIs · Multi-Tenancy

PROFILE

Laravel backend developer, three years in. I build the half of a product nobody demos: the schema, the permission layer, the API contract. Ten production systems so far, spanning gas distribution, CMS, ticketing, HR, payments, loyalty and e-commerce. Most are multi-tenant and all of them run behind role-based access control. Currently at RatoGuras, with a BE in Computer Engineering from Purbanchal University. What I care about is a system in its second year: migrations you can read, abstractions that stay boring, and an API someone else can pick up without asking me first.

TECHNICAL SKILLS

Backend	PHP 8, Laravel, MySQL, REST APIs, Eloquent, Livewire, Redis, queues and scheduled jobs, hand-written SQL
Architecture	Role-based access control, multi-tenancy, API design and versioning, token auth, schema migration, query optimisation, third-party integrations
Frontend	JavaScript, Blade, Vue.js, Tailwind, Bootstrap, jQuery, HTML, CSS
Tooling	Git, Docker, Linux, Composer, Postman

EXPERIENCE

Backend Developer

2024 — Present

RatoGuras — Biratnagar, Nepal · ratoguras.com

- Build and maintain Laravel business systems for client organisations, owning the backend end to end: data model, migrations, permission layer and API surface.
- Delivered Subidha Gas ERP, a multi-branch gas distribution platform covering inventory, cylinder tracking, billing and staff roles, running in production.
- Design role-and-permission engines and tenant isolation so one codebase serves multiple clients without leaking data between them.
- Write RESTful APIs with token auth, versioning and rate limiting, documented so frontend and mobile developers can integrate without hand-holding.
- Optimise slow queries and N+1 hotspots, add indexing and caching, keep migrations reversible.

Laravel Intern → Backend Developer

AUG 2023 — FEB 2024

IT Service Nepal — Biratnagar, Nepal · itservicenepal.com

- Built backend features for e-commerce and financial applications, moving from intern to contributing developer inside six months.
- Implemented API integrations with third-party services, handling auth, retries and error surfaces.
- Database optimisation — schema refactors, indexing and migration cleanup on live datasets.
- Contributed to payment management, CMS and HR modules in a senior-led team.

Freelance Backend Developer

2023 — 2024

Independent — Biratnagar, Nepal

- Engineered and maintained Laravel applications for direct clients, including multi-tenant systems and e-commerce platforms.
- Scoped requirements with non-technical clients, turned them into data models and working screens, handed over documented. Shipped gym management, CMS and ticketing builds.

SELECTED WORK

Subidha Gas ERP ENERGY
marutigas.ratoguras.com

Gas distribution ERP — inventory and cylinder tracking, customer accounts, billing, and branch/staff management under granular role-based access.

Laravel · MySQL · RBAC · multi-tenant

Rathicol Sathi Yojana REWARDS
rathinew.hamro.com

Loyalty and rewards platform for a dealer network — member enrolment, point accrual against purchases, redemption workflow and admin reporting.

Laravel · MySQL · RBAC · REST API

Pearl Makeup Studio CMS BEAUTY
pearlmakeupstudio.com

Custom CMS for a makeup studio — service catalogue, gallery, booking enquiries and a content-editable public site managed by non-technical staff.

Laravel · Blade · MySQL · RBAC

Lokta App Ticketing System SUPPORT
support.loktaapp.com

Support desk — ticket intake, assignment and status pipeline, threaded replies, priority handling and agent-level permissions.

Laravel · MySQL · RBAC · queues

Payment Management System FINTECH
pallavipms.nep.onl

Payment and collection tracking — invoices, instalment schedules, receipts, outstanding-balance reporting and an audit trail on every transaction.

Laravel · MySQL · RBAC · reporting

Lahar Ecommerce App COMMERCE
laharhub.com

E-commerce backend — catalogue and variants, cart and checkout, order lifecycle, and a REST API consumed by the client-facing app.

Laravel · MySQL · REST API

Gym Management System FITNESS
github.com/NischalShrestha07/Gym-Management-System

Member tracking, subscription plans, attendance logs, payment history and staff management with full role-based access control.

Laravel · MySQL · REST API · RBAC

Social Networking System SOCIAL
github.com/NischalShrestha07/DevDoko

User profiles, friend connections, a news feed, real-time messaging, post interactions and a notification system.

Laravel · MySQL · broadcasting · REST API

HRMS HR
github.com/NischalShrestha07/HRMS-COLLEGE

HR management system — employee records, department and designation hierarchy, attendance, leave requests and approval chains.

Laravel · MySQL · RBAC

Orchid CMS SALON
private client build — source not public

Salon website CMS — editable pages, service and pricing management, media library and staff accounts with scoped permissions.

Laravel · Blade · MySQL · RBAC

EDUCATION

BE Computer Engineering
2021 — 2025

Purbanchal University School of Engineering — Biratnagar, Nepal

- Coursework: data structures, algorithms, database management systems, computer networks, software engineering, web development, IoT systems.

SEE & +2 Science
2018 — 2021

Shree Satyanarayan School — foundations in science, mathematics and electronics.
